

MINNESOTA Boating Guide

2014

a summary of laws and rules

PLEASE NOTE

This book summarizes Minnesota's boating laws and regulations in an easy-to-read form. It supplies the information that most boaters need to know about operating watercraft on the state's lakes and rivers. It does not present the actual laws and regulations, however. If you desire a copy of these laws and regulations, please contact the Department of Natural Resources' Boat and Water Safety Section at the address listed at the end of this booklet.

It should also be noted that laws and regulations are subject to change by the legislature and through public hearings. Boaters may also be subject to federal and local rules and restrictions.

**SEE PAGE 48 FOR INFORMATION
ON LOCAL BOATING RESTRICTIONS
AND
PAGES 63-64 FOR FEDERAL WEBSITES**

Reminders for 2014

- ★ The registration fee for certain craft changed as of Jan. 1, 2013 - see pages 4-5 for details.
- ★ Aquatic Invasive Species (AIS) laws have changed from 2012 - see page 23.
- ★ Stand up paddleboards must be registered as a watercraft, display valid registration and carry a USCG approved life jacket for each person.

LICENSING YOUR BOAT

WHAT MUST BE LICENSED

All motorized and non-motorized watercraft must be licensed by the Department of Natural Resources (DNR). The types of watercraft that must be licensed include, but are not limited to, motorboats, row-boats, sailboats, sailboards, stand up paddleboards, canoes, kayaks, paddle boats, rowing shells or sculls, all-terrain vehicles used in the water, and inflatable craft.

Exceptions to this law are as follows:

1. Watercraft currently registered in another state and not kept in Minnesota for more than 90 consecutive days.
2. Watercraft from a country other than the United States and not kept in Minnesota for more than 90 consecutive days.
3. Watercraft owned by the United States government or other specified governmental units, except those boats used for recreational purposes.
4. Watercraft documented with the United States Coast Guard. (Note: Documentation is a process where official papers on craft five net tons or larger are issued by the Coast Guard instead of state registration.)
5. A ship's lifeboat.
6. Waterfowl boats during the waterfowl hunting season, rice boats during the harvest season and seaplanes.
7. Non-motorized watercraft 10 feet in length or less (effective 1/1/13).

Unless a license is issued and in effect, it's against the law to operate or permit the operation of any watercraft which requires a license.

LICENSE PROCEDURES AND FEES

Register your watercraft in person at any deputy registrar of motor vehicles (where you license your car); at the DNR License Center in St. Paul (address at end of this booklet) or do renewals online at licenses.dnr.state.mn.us and click on vehicle & boat renewal. When you register your boat, know its length, manufacturer, type of hull material (wood, metal, or plastic), type of propulsion, model, year, serial or hull identification number (HIN) and have a sales receipt that shows you have paid the sales tax.

HULL IDENTIFICATION NUMBER

A hull identification number (HIN) or serial number is vital in registering and titling your boat. It is also important to recovery if your boat is stolen or if there is a recall campaign by the manufacturer.

HINs can be found on all boats manufactured since model year 1973. They are a letter-number combination usually about 12-17 digits long (example: ABC12345L402) and are usually found on the right side of the stern or transom of the craft on the outside. They may be stamped into the fiberglass or aluminum, or be on a separate plate. Location may vary slightly on pontoon boats, personal watercraft, kayaks, canoes etc. Boats built before November 1972 should have a shorter serial number somewhere on the craft.

***Hull Identification
Number - usually
found on stern***

Length is the straight-line distance from the foremost part of the boat (bow) to the rearmost part of the boat (stern). Bowsprits, outboard motor brackets, rudders and other attachments are not included in the measurement.

Watercraft licenses cover a period of three calendar years and expire on December 31 of the last year the license is valid. The expiration date appears on both the license certificate and on the validation decals which are applied to the boat.

LICENSE CERTIFICATE AND NUMBERING

If you apply for a new boat registration or renew an existing one in person at a deputy registrar (any place you get your auto license) or the DNR License Center, you will receive your boat license decal and registration card on the spot. If you apply through the mail, it will probably take several weeks before you receive your decal and card.

Sign your license and keep it on board when you use it. If you are operating a non-motorized canoe, kayak, rowing shell, paddle boat, sailboard or sailboat you don't have to carry the license with you. However, if an enforcement officer asks to see it, you must produce it within a reasonable time.

The owner of rented watercraft may keep the license certificate at the place the boat is rented from. The name of the rental business must be printed on both sides of the rear half of the watercraft in letters at least three inches high.

The number issued to your boat appears on the license. Except for non-motorized canoes, kayaks, rowing shells, paddle boats, sailboards and sailboats, this number must be displayed on the forward half of the hull on each side of the craft (see illustration on page 6). The letters and numerals must be at least three inches high, of a block character, and contrast with the background. They can

Fees for Watercraft Registration and Titling *(effective 1/1/14)*

Type and Length	Invasive			Filing Fee	Total Cost
	3 Yr. Fee	Species Surcharge	ELS Fee per Transaction		
Watercraft owned by non-profit organization and used substantially to teach water safety (camp, Boy Scouts, etc.)	\$4.50	\$5.00	\$1.50	\$7.00	\$18.00
Rental or lease watercraft up to and including 19 feet (Rental watercraft over 19 feet - see categories below for fees)	\$9.00	\$5.00	\$1.50	\$7.00	\$22.50
Canoes, kayaks, sailboards, paddle boats, paddleboards and rowing shells (non-motorized boats 10 feet or less are exempt from registration.)	\$10.50	\$5.00	\$1.50	\$7.00	\$24.00
Sailboats up to and including 19' (Sailboats over 19' same as pleasure craft.)	\$10.50	\$5.00	\$1.50	\$7.00	\$24.00
Pleasure watercraft less than 17 feet	\$18.00	\$5.00	\$1.50	\$7.00	\$31.50
Pleasure watercraft 17-19 feet	\$27.00	\$5.00	\$1.50	\$7.00	\$40.50
Pleasure watercraft over 19 feet but less than 26 feet	\$45.00	\$5.00	\$1.50	\$7.00	\$58.50

Pleasure watercraft 26 feet but less than 40 feet	\$67.50	\$5.00	\$1.50	\$7.00	\$81.00
Pleasure watercraft 40 feet and over	\$90.00	\$5.00	\$1.50	\$7.00	\$103.50
Personal watercraft, rental or personal Dealer's license, regardless of the number of watercraft owned by the dealer	\$37.50	\$5.00	\$1.50	\$7.00	\$51.00
Any watercraft more than 19 feet in length for hire with an operator	\$67.50	\$5.00	\$1.50	\$7.00	\$81.00
Transfer of registered boat without renewal	\$75.00	\$5.00	\$1.50	\$7.00	\$88.50
Watercraft Title (see page 10)	\$4.50	\$0.00	\$1.50	\$7.00	\$13.00
Duplicate Title	\$15.00	\$0.00	\$0.00	\$7.00	\$22.00
Transfer Title	\$4.00	\$0.00	\$0.00	\$7.00	\$11.00
Duplicate Registration Card	\$10.00	\$0.00	\$0.00	\$7.00	\$17.00
Duplicate Decal	\$4.50	\$0.00	\$1.50	\$4.50	\$10.50
	\$0.00	\$0.00	\$1.50	\$4.50	\$6.00

 For each title transaction, new registration or any transaction involving a transfer, the filing fee is \$7.00. For each renewal or duplicate registration transaction, the filing fee is \$4.50.

 NOTE: \$7.00 filing fee is only charged once per boat transaction. The \$1.50 ELS fee is not charged on any title transaction.

be painted or attached to the craft. They should read from left to right and must always be legible.

Before applying decals or numbers on the watercraft, make sure the surface is free of dirt, grease, water, oil and wax. When you place your number on your boat, leave a 2 to 3 inch space - or provide a hyphen - between the MN and the four-digit number. Leave another 2 to 3 inch space or hyphen between the number and the two letters which follow. Place the validation decal to the stern or rear of the license number within four inches of the license number (see illustration below). **Remember, only the current decal must be visible. Remove the expired decals first, before applying the new ones.**

Correct placement of license numbers and decals

The license number which appears on your watercraft license card must be displayed on your boat as shown below.

License Number
at least 3" high letters 3" { MN 1234 AB

License Number
at least 3" high letters 3" { MN 1234 AB

No other number, letter, or design may appear within 24 inches of the license number or decal.

The license number issued to your craft appears on the decal and on the card. If your canoe, kayak, rowing shell, paddle boat, sailboard or sailboat doesn't have a motor, **place the decal on each side of the forward half of the craft.** No three-inch numbers are necessary (see illustration below).

On sailboards and non-motorized sailboats, you may also place the decals on the stern if it is impossible, because of the boat's design, to place them on the bow (see illustration below).

If your canoe or sailboat is motorized, affix the three-inch letters and numbers as previously described for other motorized craft. The square decal should be placed to the stern or to the rear of the number (see illustration below).

Correct placement of license numbers and decals for motorized canoes and sailboats

EXPIRATION AND RENEWAL

All watercraft licenses expire on December 31 of the last year the license is valid. Normally, you will receive a notice by mail to renew your license for another three-year period. But whether you are notified or not, you are responsible for renewing the license for your watercraft.

When you obtain your new license certificate and validation decals, discard your old license

certificate and replace the expired decals on your boat with the new ones. **Remember, only the current set of decals must be showing.**

DUPLICATE LICENSES

Need a duplicate license? Stop by your local deputy registrar of motor vehicles office or the DNR License Center. To apply by mail, write to the DNR License Center and ask for it. Be sure to sign your name on the letter and include the registration number, description of the boat and the hull identification number (HIN). The fee for a duplicate license is listed on the watercraft license fee chart.

TRANSFER OF OWNERSHIP

If you buy a boat that is currently licensed in Minnesota, obtain the current license certificate from the previous owner. Send or deliver it, along with an application for transfer and the transfer fee listed on the fee chart, to the DNR License Center or deputy registrar. Transfer applications must be made within 15 days after the transfer actually occurs. The transferred registration is valid only for the time remaining on the previous owner's registration. Then you must renew your license.

DESTROYING OR ABANDONING YOUR BOAT

If you destroy or abandon your watercraft - or if you license it in another state - notify the License Center within 15 days.

DEALER'S LICENSE

Boat and motor dealers, wholesalers and manufacturers may apply for a dealer's license for watercraft used for demonstration purposes or for any other purpose necessary to conduct business. A dealer will be issued only one number. This number must be displayed on both sides of boats used for these purposes, however, and may be detachable.

COLLECTOR WATERCRAFT

Watercraft that were built before July 1, 1959, and are used solely as a collector's item, have the option of displaying the boat registration number and current decal on the forward half of the boat on both sides on a detachable plate or board. The number size, type and decal placement is the same as noted on pages 3-8 of this guide.

WATERCRAFT TITLING

As a safeguard for boat owners, the Minnesota Legislature created a law which requires the titling of certain watercraft.

A watercraft title provides proof of ownership, which becomes very important when buying or selling a boat.

A title also protects businesses that make boat loans, and aids in the recovery of stolen watercraft.

To determine whether or not your boat needs to be titled, review the check list on the following page.

If your boat matches any of the descriptions below, it **DOES NOT need to be titled. My boat:**

- Is registered in another state and is never used in Minnesota for over 90 days at a time.*
- Was manufactured before August 1, 1979.*
- Is 16 feet or less in length.*
- Is a rowboat with oar locks and an outboard motor rating of less than 40 HP.*
- Is a canoe, kayak, ship's lifeboat or seaplane.*
- Is a documented vessel (documentation is a process where official papers are issued by the Coast Guard on boats of five net tons or larger).*
- Is owned by a manufacturer or dealer and is held for sale.*
- Is used by a manufacturer for testing purposes only.*
- Is a waterfowl boat used only in season for waterfowl hunting.*
- Is a rice boat used only in season for ricing.*
- Is owned by a resort or recreational camping area which is licensed by the Minnesota Department of Health.*
- Is a rowing shell or scull (not an ordinary rowboat).*
- Is owned by the United States, a state, this state, or a political subdivision.*
- Was not previously issued a title from another jurisdiction.*

If you didn't check off any of the above conditions, you **do** need to title your boat.

If you need to title your boat, or aren't sure if it needs to be titled, contact any deputy registrar of motor vehicles office or the Department of Natural Resources License Center for more information.

REQUIRED EQUIPMENT

LIFE JACKETS

There are five types of life jackets approved for use on recreational boats:

TYPE I

TYPE II

Type I — Off-Shore Life Jacket. This is a vest or yoke type device generally found on commercial craft. It is designed to turn most unconscious persons from a face downward to a face up position in the water.

Type II — Near-Shore Buoyant Vest. The buoyant vest usually looks like a horse collar and is worn like a bib. It has an unconscious turning ability similar to the Type I, but it will not turn as many persons under the same conditions.

TYPE III

Type III — Flotation Aid. These devices are usually foam-filled and come in several colors and styles, including full-sleeved jackets. Type III devices are not designed to turn an unconscious victim, but they do provide protection for immersion hypothermia (exposure to cold water).

Type IV — Throwable Devices. (Buoyant Cushion, Ring Buoy or Horseshoe Buoy) These devices are designed to be thrown to a victim in the water, rather than worn. Cushions especially should be checked often to see if they are in serviceable condition.

TYPE IV

Type V — Special Use Devices. These are designed and approved for restricted uses such as a sailboarding harness, duck hunting flotation coveralls, or a whitewater rafting vest. This type of flotation device is restricted to the particular activity for which it was designed. The label will indicate any restrictions that apply to the particular device. Some Type Vs such as the “hybrid life jacket” must be worn to be counted in the total number of life jackets on board your boat.

TYPE V

INFLATABLE

Inflatable Life Jackets — The inflatable life jacket has the advantage of being very comfortable and easy to wear. Once inflated, the flotation is equal to or greater than traditional life jackets. Inflatables do have a couple of disadvantages. They must be in-

flated to provide flotation, they may not provide as much protection from cold water as some traditional foam life vests, they require regular maintenance and rearming after use to ensure that they will float you, and some inflatable life vests are required to be worn in order to be counted as one of your U.S. Coast Guard approved wearable flotation devices. Inflatables are not intended for use on personal watercraft, by children, or while water skiing or similar sports. Before purchasing, make sure that "U.S. Coast Guard Approved" is visible somewhere on the package or on the device itself.

Life Jacket Requirements

The following life jacket requirements* apply to all inland and border waters of the state. State law also requires children under 10-years-old to wear a life jacket on board all boats, with some exceptions. See pages 16-17.

The requirements for life jackets are as follows:

On all boats, regardless of length (including canoes, kayaks, stand up paddleboards and waterfowl boats), there must be a readily accessible U.S. Coast Guard approved Type I, II, III or V wearable life jacket for each person on board. **Type IV throwable devices, such as buoyant cushions, are no longer acceptable primary lifesaving devices.**

IN ADDITION, on boats 16 feet or longer (except canoes and kayaks) there must also be at least one U.S. Coast Guard approved Type IV throwable device, such as a buoyant cushion or ring buoy immediately available for each boat.

The law does not state that life jackets must be worn, only that they are readily accessible **except for personal watercraft (Wave Runners, Jet Skis, etc.) and children under 10 (see page 16).** HOWEVER... we highly recommend that life jackets

always be worn by everyone on board any boat.

Check the label on the life jacket to make sure it is a U.S. Coast Guard approved flotation device and what type of device it is.

* *The following are exempt from state life jacket carriage laws: 1) All sailboards, and 2) rowing team members specified in law and accompanied by a chase boat carrying the required life jackets.*

**Less than 16 feet
or any size canoe
or kayak**

**One life jacket
per person**

**16 feet or longer
except canoes
and kayaks**

PLEASE NOTE:

- ★ The life jacket must be of the appropriate size for the intended wearer.
- ★ Readily accessible - means easily retrievable within a reasonable amount of time in an emergency. Life jackets in plastic bags, locked lockers, or under anchors or line are examples of life jackets that are **not** accessible.
- ★ Immediately available - means Type IV throwable devices must be easily reached in time of an emergency by someone on board the boat. Generally this means they will be in the open and not in a container.
- ★ A U.S. Coast Guard approval label must be

printed on or attached to the device, and you must follow all restrictions on it.

- ★ All life preservers must be in serviceable condition. That means that the life jackets must be free of tears, rot, punctures and waterlogging (especially on kapok devices) and that all the straps, zippers and buckles are present and in good shape.
- ★ A U.S. Coast Guard approved life jacket must be worn by a person being towed on water skis or other device, or carried in the towing watercraft.
- ★ A U.S. Coast Guard approved Type V device may be substituted for any other approved device if it meets the same requirements and is noted on the Type V device (i.e. "Equivalent to an approved Type III device").
- ★ Anyone operating or riding on a personal watercraft must **WEAR** a U.S. Coast Guard approved Type I, II, III, or V life jacket.
- ★ **Mandatory Child Life Jacket Wear Law:** Minnesota law requires a U.S. Coast Guard approved life jacket to be worn by children less than 10 years old when aboard any watercraft while underway. Underway means not attached to a permanent mooring or tied to a dock. There are exceptions to the wear law for:
 - (1) children who are below the top deck or in an enclosed cabin,
 - (2) children aboard passenger vessels being operated by a licensed captain,
 - (3) children on a boat that is anchored for the purpose of swimming or diving.
- ★ Some infants are too small for any life jacket, even though the label may say 0-30 lbs. In general, **babies under 6 months or 16 pounds** are too small for a life jacket to be effective due to the size of their head in rela-

tionship to their body mass. If your infant is newborn, please consider waiting until the baby is a little older before taking them boating. NOTE: Fastening a boat cushion to a car seat is not considered a lawful flotation device for an infant and could trap the baby underwater if your boat capsized and the seat entered the water upside down.

NAVIGATION LIGHTS

Navigation lights must be on from sunset to sunrise (see sunrise/sunset schedule at end of booklet).

- ★ **Non-motorized Boats** (see illustration below). All non-motorized watercraft, whether underway or at anchor, must at least carry a white lantern or flashlight. This light should be strong enough so that other boats around the horizon can see it at least two miles away. The light must be displayed in sufficient time to avoid a collision with another watercraft. (Note: Canoes, sailboats etc. that are operating under power must follow the lighting rules for motorboats.)*

- ★ **Motorboats.** Most motorboats 16 feet or more in length will likely be equipped with the correct navigation lights by the manufacturer. In any case, the lights must be dis-

played according to state rules described in this section.*

- ★ **Visibility Rules.** White lights must be visible for two miles on a dark, clear night (with one exception under the International Rules). Combination or side lights must be visible for one mile.

Combination or side lights must shine red to port (left side) and green to starboard (right side). They must be attached so the light shows from directly ahead to 22.5° to the rear of the beam (midpoint of the boat) on the respective side. Lights may be detachable and need only be displayed from sunset to sunrise.

- ★ **Lighting Tips.** 1) Docking lights on boats should only be used near docks or shore – not on open water and 2) Check navigation light sockets and wiring often – they can corrode over time.

* Boats on waters subject to U.S. jurisdiction may also display navigation lights under current federal inland regulations.

Option A

When underway, motorboats less than 40 feet long display (see diagram below):

- (1) A 225° combination red and green bow (front) light.
- (2) A 360° white stern (rear) light. When at anchor, only the 360° white light is necessary.

Option B

Motorboats 65 feet or less, when underway, display (see diagram below):

- (1) Either separate 112.5° red and green side lights or a combination 225° red and green bow light.
- (2) A 225° white light on the forward half of the boat, placed at least three feet above the red-green lights, showing 112.5° to each side and visible for three miles. On boats 40 to 65 feet long, this light must be at least nine feet above the gunwale.
- (3) A 135° white light on the stern half of the craft showing 67.5° to each side. This light may be carried off the center line. When at anchor, only one 360° white light is necessary.

OR

FIRE EXTINGUISHERS

All fire extinguishers must be U.S. Coast Guard approved, fully charged, and readily accessible.

- ★ When looking for an extinguisher at a store or marine dealer, it is important to look for the words “U.S. Coast Guard Approved” right on the carton.
- ★ Although two sizes of extinguishers are approved for recreational craft (B-I or B-II), most extinguishers on the market will be B-I. The words “Marine Type USCG Type BC-Size I” will be in small letters right on the extinguisher’s label along with the approval number. The letter “B” means the extinguisher will put out flammable liquid fires. The letter “C” means it can also be used for electrical fires.
- ★ Fire extinguishers are a good idea on any boat where fuel is used or carried. They are required as follows:

Boat Size	Fire Extinguisher(s) Required*
< 26' with enclosed engine, fuel tanks or other spaces**	1 size B-I
26' < 40'	2 size B-I <u>or</u> 1 size B-II
40' - 65'	3 size B-I <u>or</u> 1 size B-II & 1 size B-I
> 65'	3 size B-II

* When a motorboat is equipped with a U.S. Coast Guard approved fixed fire extinguishing system in the engine compartment, one less B-I extinguisher is required.

** Enclosed engines and fuel tanks are generally found on inboards or stern drives and also on larger outboard boats with built-in fuel tanks. Most motorboats are required to carry at least one fire extinguisher. However, open outboard boats with unenclosed portable fuel tanks and no floorboards, decking, a cabin or other spaces that could trap fuel vapor are not required to carry an extinguisher.

VENTILATION

Motorboats carrying or using any fuel that has a flashpoint of 110°F or less (like gasoline) in any compartment must be equipped with an efficient ventilating system to remove combustible gases. This system must consist of at least one intake duct that extends from the deck below the level of the carburetor air intake (or halfway to the bilge) and an exhaust duct that extends from the deck to the lowest portion of the bilge. The cowls of these ducts must be properly trimmed for maximum ventilation. A power-operated bilge blower is highly recommended and it should be run at least four minutes before starting the engine.

FLAME ARRESTORS

Gasoline engines, other than outboard motors, must be equipped with a U.S. Coast Guard approved backfire flame arrestor on the carburetor.

WHISTLES/HORNS

- ★ Motorboats 16 feet to less than 26 feet long must be equipped with a hand, mouth, or power-operated whistle or horn capable of producing a continuous sound for two seconds and audible for at least one-half mile.
- ★ Motorboats 26 feet to less than 40 feet in length must be equipped with a hand or power-operated horn or whistle capable of producing a continuous sound for two seconds and audible for at least one mile.
- ★ Motorboats 40 feet or more in length must be equipped with a power-operated horn or whistle capable of producing a continuous sound for at least two seconds and audible for at least one mile.
- ★ The only boat that can carry a siren is a government patrol craft.

MUFFLERS/NOISE LIMITS

All watercraft motors must have a muffler, underwater exhaust, or other device that adequately suppresses the sound of the motor.

It is unlawful to modify, equip, sell or operate a motorboat (except under a permit from the county sheriff or U.S. Coast Guard) that exceeds the levels noted in the table below. It is also illegal to have an altered muffler, muffler cutout, muffler bypass, or any other device designed or installed so that it can be used to continually or intermittently bypass any muffler or muffler system, or to reduce or eliminate the effectiveness of a muffler or muffler system.

Motorboat Noise Law Summary Chart

Boat or Engine Manufacture Date	Pass By Test*	Stationary Idle Test*
	Usually taken at 50'. An equivalent reading may also be taken at other distances.	Taken at least 4' above the water and at least 4' behind the transom of the boat.
Before January 1, 1982	84 dBA	86 dBA
January 1, 1982 and after	82 dBA	84 dBA

* Officers and deputies may use either (or both) the pass by or stationary test procedure.

MARINE TOILETS

Under state law, toilets on board watercraft must be no-discharge devices. Waste must be retained on board for proper disposal after returning to shore.

For a copy of a fact sheet on marine toilets, drain water disposal and areas where USCG certified treatment devices may be used under federal rules, contact the DNR Boat and Water Safety Section at the address or phone number in the Agency Directory at the end of this booklet.

DO YOUR PART TO STOP AQUATIC HITCHHIKERS!™

Aquatic invasive species (AIS) cannot move across the land without help, but when given a lift they can spread almost anywhere. It's up to everyone who recreates in Minnesota's lakes and rivers to help prevent the introduction and spread of AIS.

Required Actions - It's the law!

✓ **Clean** all visible aquatic plants, zebra mussels, and other invasive species from your boat, trailer and other water-related equipment *before* leaving a water access or shoreland property. It's illegal to transport aquatic plants or animals whether dead or alive.

✓ **Drain** water-related equipment (boat, ballast tanks, portable bait container, motor) **and** drain bilge, livewell and baitwell by removing drain plugs *before* leaving a water access. **Keep drain plugs out** and water-draining devices open while transporting watercraft.

✓ **Dispose** of unwanted bait in the trash. It's illegal to release live bait into the water or to release worms on the ground.

Recommended Actions - Protect our waters.

✓ **Spray, rinse, or dry** boats and recreational equipment before going to another water body, especially if your boat has been in the water or moored for more than 24 hours. Do one or more of the following:

- ★ **Spray** with high-pressure water;
- ★ **Rinse** with very hot water - over 120°F;
- ★ **Dry** for at least 5 days.

To report new AIS sightings contact Minnesota DNR Invasive Species Program at 888-646-6367 or 651-259-5100 or visit mndnr.gov/AIS. To report a violation, contact a local conservation officer. See page 62 for contact information.

GENERAL OPERATION

ENFORCEMENT

Enforcement of Minnesota's boat and water safety laws rests with the DNR's conservation officers and the county sheriffs. All state and county enforcement craft will be marked on both sides or with a blue state pennant. Some waters of the state are also under federal jurisdiction. The U.S. Coast Guard and the National Park Service enforce federal boating regulations.

Whenever an enforcement officer contacts you, you are required to stop and allow him or her to come alongside. The officer may warn you about a storm or caution you about the way you're operating your boat. Always remember that a key job of these officers is to ensure your safety afloat.

If you need an enforcement officer, contact him or her by phone, in person, or by mail at the locations given at the end of this pamphlet. Boaters on some waters may be able to request assistance by using a marine radio. Examples of these areas are Lake of the Woods, Lake Superior, the Lower St. Croix River, the Mississippi River downstream from Minneapolis, the Minnesota River downstream from Shakopee, and Lake Minnetonka.

Violation of a boat and water safety statute or rule is a misdemeanor, with some exceptions for repeat violations or more serious offenses.

AGE OF OPERATORS

The restrictions on boat operators appear on the next page. Operator's permit education materials can be obtained from the DNR (addresses and phone numbers at end of this booklet), and sheriff's offices.

Motorboat Operator Age Restrictions (except personal watercraft - see page 38)

Operator Age	Restrictions
less than 12 years of age	<ol style="list-style-type: none"> 1 25 hp or less - no restriction. 2 more than 25 thru 75 hp - must have someone at least 21 on board within reach of the controls. 3 over 75 hp - cannot operate, even with adult on board.
12-17 years of age	<ol style="list-style-type: none"> 1 25 hp or less - no restriction. 2 over 25 hp - must either have: <ul style="list-style-type: none"> ★ a watercraft operator's permit, <i>or</i> ★ someone at least 21 on board within reach of the controls.

If you are age 12 - 17, visiting Minnesota, and already possess a valid watercraft operator's certificate/permit issued by your home state, you don't need to obtain another one from Minnesota. If you do not have a certificate from your state you may obtain one from Minnesota by successfully completing the DNR's home study boating course. It is available free by calling or e-mailing the DNR Information Center - contact information can be found at the end of this booklet.

The Minnesota Internet boating safety course at mndnr.gov/boatingcourse is an option for young boaters wishing to earn their Watercraft Operator's Permit. It's also a great idea for more

mature skippers who want to broaden their boating knowledge and perhaps receive a discount on their boat insurance. (Many boat insurance companies offer discounts to boat owners who have taken an approved boating safety course like ours.)

The great thing about our Internet course is that as soon as you pass the final exam, you can print out a temporary Watercraft Operator's Permit (12-17 years) or Adult Certificate of Completion (18 years and over) right away (see back cover).

RULES OF THE ROAD

Passing

When overtaking another watercraft going in the same direction, the craft being overtaken must maintain course and speed. The passing watercraft must keep a sufficient distance to avoid collision or endangering the other craft from its wake.

Meeting

When two watercraft approach each other "head-on," each must alter course to the right to avoid collision. If the two watercraft are far enough to the left of each other, no change in direction is needed for safe passage. Both watercraft will maintain their course and speed so as to pass clear of each other, and keep to the right in narrow channels.

Crossing

If two watercraft approach each other at a right angle, the watercraft to the right shall have the right-of-way.

Non-Motorized Craft

Non-motorized craft (sailboats, canoes, etc.) have the right-of-way over motorized craft in all situations, except when the non-motorized craft is overtaking or passing.

Commercial Vessels

Small boats should not insist on the right-of-way when approaching large commercial vessels, which are limited in maneuverability.

Emergency Craft

All watercraft will yield right-of-way to an authorized watercraft displaying a red or blue flashing light.

Move Over Law

When approaching and passing a law enforcement watercraft with its emergency lights activated, the operator of a watercraft must safely move the watercraft away from the law enforcement watercraft and maintain a slow-no wake speed while within 150 feet of the law enforcement watercraft.

WATERWAY MARKERS

Official waterway markers may be in the form of a buoy, sign or light, either in the water or on shore. They assist the boater by marking channels, denoting unsafe areas, directing traffic, controlling speed, protecting resources and other functions. Official markers are usually placed by the U.S. Coast Guard, state, county or local governmental unit. **Private markers of any type may not be placed in the water overnight without a permit from the county sheriff.**

The illustrations on pages 29-31 show the most common buoys used in Minnesota. Although just buoys are shown here, signs can be substituted in certain areas. As an example, a green square sign is the same as a green buoy and red triangular sign is the same as a red buoy - these are often called "daymarks." They can be used to mark each side of a channel, which is common on the Mississippi River below the Twin Cities. A red-white octagonal sign

can be used to mark the center of a channel. Regulatory and informational signs are generally a white rectangle with orange markings and black lettering.

If a buoy or sign is lighted, it will usually display the color and flash characteristics noted underneath each buoy on pages 29-31. "Flashing" means not more than 30 flashes per minute. "Quick-flashing" means at least 60 flashes per minute and generally indicates caution or danger. Here are some tips on waterway markers to make boating more enjoyable:

- ★ Don't rely entirely on waterway markers, especially buoys. They can move off station due to wind, waves, current, ice or other reasons.
- ★ Buoys and other waterway markers may not be present outside of the normal boating season. Check locally before heading out.
- ★ Unless you are very familiar with that body of water, avoid travel on lakes and rivers during the hours of darkness.
- ★ Use care on observing white flashing lights since their meaning depends on that of the waterway marker.
- ★ Red and green channel markers may be numbered: green - odd and red - even.
- ★ Size specifications for buoys. For all buoys except mooring buoys, the minimum height above water is 36 inches and the minimum diameter is 9 inches. For mooring buoys the maximum size is 24 inches in diameter, if spherical, or a maximum of 24 inches wide if some other shape. Mooring buoys must extend at least 8 inches above the water.

Channel Marker Buoys

★ All-green and all-red companion buoys indicate that the boating channel is between them. In flowing water, the red buoy is on the right side of the channel when facing upstream.

★ As of 2003, there are two striped buoys that mark safe navigational areas for boaters. The change was necessary in order to comply with the U.S. Aids to Navigation System: 1) the red-white striped buoy (usually with a red topmark) now indicates the center of a channel and should be passed closely on either side; 2) the black and white striped buoy (formerly red-white striped) indicates there is a shoreward obstruction and that you should not pass between it and the nearest shore.

Regulatory Buoys and Signs

★ **Boats Keep Out.** A white buoy or sign with an orange diamond and cross means that boats must keep out of the area. Black lettering on the buoy or sign gives the reason for the restriction, for example, SWIM AREA.

BOATS KEEP OUT
flashing white

DANGER
quick-flashing white

★ **Danger.** A white buoy or sign with an orange diamond warns boaters of danger - rocks, dams, rapids, etc. The source of danger will also be lettered in black. In winter, ice hazards may also be identified with this marker in the form of a sign.

CONTROLLED AREA
flashing white

INFORMATION
flashing white

MILFOIL
none

★ **Controlled Area.** A white buoy or sign with an orange circle and black lettering indicates controlled or restricted areas on the water. The most common restriction is slow - no wake speed. *Slow - no wake means operating your boat at the slowest possible speed necessary to maintain steerage, but in no case greater than five miles-per-hour.*

★ **Information.** A white buoy or sign with an orange rectangle provides the boater with information or directions. Information will be lettered in black.

★ **Milfoil.** A yellow buoy or sign indicating that an area is infested with Eurasian watermilfoil. The words “Milfoil” or “Milfoil Area” will appear in black letters.

★ **Mooring Buoys.** Buoys designed for mooring boats are all-white with a blue stripe midway between the top and the waterline. A minimum of 16 square inches of white reflectorization, part of which must be visible from any direction, is required on all mooring buoys. (Obtain a permit from the county sheriff before placing a mooring buoy in the water.)

GENERAL PROHIBITIONS

It's against the law:

- ★ To operate a watercraft in a careless or reckless manner.
- ★ To operate a watercraft so its wash or wake endangers, harasses, or interferes with any person or property.
- ★ To operate a watercraft so it obstructs ordinary navigation.
- ★ To operate a watercraft within an area legally marked off as a swimming area, or within 150 feet of a diver's warning flag (see page 43).
- ★ To ride or sit on the gunwales, bow, transom,

or decking over the bow, sides or stern of any motorboat while underway, unless it is equipped with an adequate railing, or to operate a motorboat while any person is so riding or sitting.

- ★ To chase wildlife with a motorboat, or operate a boat where it is prohibited – including marked spawning beds. *Avoid traversing any emergent or floating vegetation, if possible.*
- ★ To intentionally obstruct a seaplane.
- ★ To attach a watercraft to any buoy, except a mooring buoy, or to tamper, remove, or destroy a navigational aid.
- ★ To deposit or leave refuse in or upon the waters of the state or at public access areas.

CAPACITY AND OVERLOADING

The boat's operator must limit the total horsepower, weight AND maximum number of passengers to that shown on the capacity plate installed by the boat's manufacturer. It is unlawful and dangerous to load or power your boat beyond its maximum capacity.

BOATING WHILE INTOXICATED (BWI) - The alcohol concentration for impaired operation is .08.

Operating a motorboat while under the influence of alcohol, a controlled substance (or its metabolite), or other illegal chemical is unlawful. Operators who are impaired may be required to take tests by an enforcement officer. There is a penalty for refusal. BWI convictions and refusals are recorded on the violator's driver's license record.

Most of the BWI law is now found in the motor vehicle statutes, and *first time* violators (no prior DWIs of any kind) who are convicted are subject

to:

- (1) up to a \$1,000 fine plus surcharges,
- (2) possible jail time,
- (3) loss of motorboat operating privileges for 90 days during the boating season, after conviction and written notification by the DNR.

In addition to the above penalties, persons who refuse testing will also be subject to a separate and more severe criminal charge for refusal and loss of their motorboat operating privileges for one year, immediately upon refusal.

If any of the following aggravating factors are involved, the offense automatically becomes a gross misdemeanor (a 4th conviction in 10 years can result in a felony penalty):

- ★ an alcohol concentration of .20 or more,
- ★ prior DWI conviction(s) or refusal(s) of any kind in the past 10 years,
- ★ there is a child less than 16 years of age on board.

Penalties will increase with any of the aggravating factors or a refusal, and can include the following:

- ★ a higher fine,
- ★ mandatory jail time,
- ★ loss of motor vehicle driver's license,
- ★ loss of motor vehicle plates and
- ★ forfeiture of the motorboat and trailer being operated at the time of arrest.

The BWI law does not prohibit drinking alcoholic beverages aboard boats nor having an open bottle. The law applies to operators of motorboats that are not anchored, beached, moored, docked or being rowed or propelled by non-mechanical means at the time of the offense.

WATER SKIING, TUBING and WAKE BOARDING

Laws and Rules

- (1) It is unlawful to tow a person on water skis, wakeboard, tube, or similar device unless there is a mirror providing the operator a wide field of vision to the rear, or unless another person in the towing watercraft is continuously observing the person being towed.
- (2) Water skiing, tubing and similar acts are prohibited between one hour after sunset to sunrise of the following day.
- (3) Tow ropes may not be longer than 150 feet in length, unless a permit is obtained from the county sheriff.
- (4) A wearable U.S. Coast Guard approved life jacket must either be worn by the person being towed, or carried in the towing watercraft.

Note: For regulations on towing people with a personal watercraft (**Jet Ski**, PWC, etc.) - see page 36. Also, there may be local restrictions on towing (especially in the Twin Cities Area) – see page 48.

Tubing Tips

Tubing has become extremely popular over the last few years and it can be a safe and enjoyable water sport. Unfortunately, there has also been an increase in the number of accidents involving boats pulling tubes and other inflatable water toys. The accidents involve injuries caused by:

- (1) The tube hitting a wake and flipping, there-

by throwing the rider(s) into the water or against each other.

- (2) Tubes swinging out as a boat turns - hitting an object or throwing the occupant off.
- (3) Injuries caused by the tow line and when two tubes being towed by the same boat collide with each other.

Tubes are affected mostly by the maneuvers of the boat doing the towing, similar to a clock's pendulum. Riders do not have the directional control that water skiers have, so the boat operator needs to take special precautions.

Speed needs to be kept low (most tube manufacturers recommend a maximum of 15-20 mph) to reduce the likelihood and consequences of an accident. Turns should be made gradually and away from shore, other boats, swim rafts or docks to reduce the chance of collision. Tow only a single tube at a time. It is highly recommended that anyone on a tube wear a life jacket. It is also a good idea to have an observer in the towing craft, in addition to a wide-angle mirror. Many manufacturers also recommend that no one under 6-years-old be towed on a tube, and that you follow the manufacturer's recommended passenger weight limits.

PERSONAL WATERCRAFT

What is a personal watercraft? Sometimes known as **Jet Skis, Wave Runners, Sea Doos** etc., a personal watercraft is defined by law as a motorboat that is: 1) powered by an inboard motor powering a water jet pump or by an outboard or propeller-driven motor; and 2) designed to be operated by a person or persons sitting, standing, or kneeling on the craft, rather than in the conven-

tional manner of sitting or standing inside a motorboat.

All personal watercraft are considered motorboats and therefore, any regulations that govern other motorboats (such as fishing boats, cabin cruisers, etc.), also govern personal watercraft.

Personal Watercraft Laws

In summary, the law requires that:

- ★ Anyone operating or riding on a personal watercraft must **wear** a U.S. Coast Guard approved Type I, II, III or V life jacket.
- ★ Personal watercraft must travel at slow - no wake speed (5mph or less) within 150 feet of non-motorized boats, shore (unless launching or landing skiers directly to or from open water), docks, swim rafts, swimmers, or any moored or anchored boat.
- ★ Operation of personal watercraft is allowed only from 9:30 a.m. to 1 hour before sunset.
- ★ If you tow a person on water skis, or any other device, there must be an additional person on board the personal watercraft to act as an observer. (The observer does not have to be facing backward.) The skier/kneeboarder etc. must also be wearing a life jacket or there must be one on board the personal watercraft for the skier.

Factory-installed or factory-specified wide-field rearview mirrors are allowed instead of an observer when pulling a skier or other device (tube, kneeboard, etc.). The mirrors must be specified by the personal watercraft manufacturer. After-market mirrors, stick-on mirrors, motorcycle mirrors, etc., do not qualify for the observer exemption.

- ★ If the machine is equipped by the manufacturer with a lanyard-type engine cutoff switch, it must be attached to the person, life jacket or clothing of the operator when underway.
- ★ You may not operate a personal watercraft if any part of the spring-loaded throttle system has been removed or tampered with so it interferes with the return-to-idle system.
- ★ You may not chase or harass wildlife.
- ★ You may not travel through emergent or floating vegetation at greater than slow - no wake speed.
- ★ You may not operate a personal watercraft in a manner that unreasonably or unnecessarily endangers life, limb or property.
- ★ You may not weave through congested watercraft traffic, or jump the wake of another watercraft within 150 feet of the other watercraft. This includes other personal watercraft.
- ★ A personal watercraft rules decal issued by the DNR needs to be on the craft in full view of the operator.
- ★ You may not operate a personal watercraft while facing backward.

It is unlawful for the owner of the personal watercraft to permit its operation in violation of the age restrictions. See personal watercraft operator age chart on next page.

Selling and Renting Personal Watercraft

- ★ Personal watercraft dealers are required to distribute a summary of the laws and rules governing personal watercraft. Upon request by a purchaser, they must provide instruction regarding laws governing personal wa-

Personal Watercraft Operator Age Restrictions regardless of horsepower (other motoboats - see page 25)	
Operator Age	Restrictions
less than 13 years of age	Cannot operate, even with adult on board.
13 years of age	Must either have: <ul style="list-style-type: none"> ★ someone at least 21 on board, <i>or</i> ★ a watercraft operator's permit and be in visual supervision by someone at least 21.
14-17 years of age	Must either have: <ul style="list-style-type: none"> ★ a watercraft operator's permit, <i>or</i> ★ someone at least 21 on board.

tercraft, as well as safe operation of the craft.

- ★ Rental operators must provide required safety equipment and a copy of the personal watercraft laws free of charge, as well as instruction on laws and operation of the craft.
- ★ Both personal watercraft dealers and rental operations must keep a signature record of all persons who buy or rent personal watercraft. This record is to indicate that the buyer or renter has been provided with a copy of the personal watercraft laws and has read them. In addition, those persons less than 18 years of age must show their watercraft operator's permit before renting a personal watercraft, and the permit number must

be recorded on the form by the rental agent. These forms are available from the DNR Boat and Water Safety Section, must be retained for at least six months, and must be available for inspection by DNR conservation officers or county sheriff's deputies during normal business hours.

Some of the General Watercraft Laws That Apply to Personal Watercraft

- ★ All personal watercraft must display valid registration decals and registration (MN) numbers on the forward half of both sides of the craft (see pages 3-7).
- ★ Your watercraft license card must be kept on board your craft when it's in use.
- ★ All personal watercraft with enclosed engine or fuel compartments (almost all personal watercraft fall into one or the other category) must carry a fully charged, readily accessible, U.S. Coast Guard approved fire extinguisher.
- ★ Personal watercraft may not exceed the maximum watercraft noise levels. Also, you may not modify any motorboat (including personal watercraft) in a way that amplifies or increases the noise it emits above watercraft noise limits. No person shall operate or sell a motorboat so modified.
- ★ No person shall sell or offer for sale replacement or additional parts for a motorboat which when installed in the motorboat will amplify or increase the noise emitted above the noise limit. No person shall operate a motorboat incorporating such parts.
- ★ It is unlawful to operate a personal watercraft while intoxicated.

Personal watercraft concerns

Unfortunately, along with the growth in the number of personal watercraft has come accidents and complaints from lakeshore residents, other boaters and water recreation enthusiasts.

Ride with pride

Many personal watercraft accidents involve new and inexperienced riders who haven't received adequate training. If you or your family own a personal watercraft or are going to purchase one, be sure to ask the dealer to provide you with any safety information they may have for your craft. All machines are supplied with an owner's manual and many come equipped with a safety video. Be sure everyone who operates the machine (including friends and guests) watches the video and reads the safety information and knows all the special laws that regulate personal watercraft before they are allowed to operate.

Give it the gas

Many accidents have occurred because the operators forgot (or never learned) that a personal watercraft will not turn unless you apply the throttle. There is no rudder, so the only way it will turn is if there is water spraying out the steering nozzle. This seems simple, but it's amazing how easy it can be to forget when you are hurtling towards some fixed object. A normal reaction might be to cut the power and then turn the handlebars. This can be a mistake! Remember, to make a turn, keep the throttle pressed as you move the handlebars.

Use sound judgment

Personal watercraft noise complaints are one of the most common types of calls received by water safety officials. Although the sound emitted by personal watercraft is generally less than the legal noise

limit for motorboats, the way that some people operate their machines causes a great deal of concern among other people on the lake.

Some personal watercraft riders tend to run their machines for long periods of time in a relatively small area. Many of their neighbors find that having to listen to one or more personal watercraft buzzing around for several hours in front of their property is very disturbing. In fact, the problem became so severe on one Minnesota lake, local authorities banned personal watercraft operation for more than 30 minutes in one area. Jumping personal watercraft out of the water causes an increase in noise levels which can also be irritating to people.

Be a good neighbor

It's not a bad idea to talk to your neighbors before you bring your new machine home. Tell them to feel free to let you know if the noise from your machine is disturbing them and that you'll try to not operate in the same area for a long period of time. If you're going to jump waves, you had best do it far enough out in the lake so the noise won't bother people trying to enjoy a day of quiet relaxation. You might also offer to take them for a ride too. It's amazing how understanding people become after they experience the fun of riding a personal watercraft.

Protect your riding privileges

Personal watercraft can be safe and enjoyable as long as enthusiasts learn how to operate their machine carefully, become familiar with Minnesota's personal watercraft laws, and respect their neighbors' peace and quiet by moving around the lake rather than operating in just one small area. Personal watercraft riders will continue to be able to enjoy their sport without further regulation as long as they obey the laws and ride responsibly.

RENTING WATERCRAFT

- ★ All watercraft offered for rent are subject to periodic inspection by the county sheriff. An inspection decal will be issued to each craft that passes this inspection.
- ★ The rental agent is required to provide U.S. Coast Guard approved life jackets in serviceable condition, as well as all other required safety equipment.
- ★ Watercraft may not be rented, or offered for rent, unless they are in safe condition.
- ★ All rental craft must meet the federal manufacturer's flotation requirements as of the date they were constructed.
- ★ A boat may not be rented to a person who is under the influence of alcohol or a controlled substance.
- ★ A rental boat loaded beyond its weight capacity or powered beyond its horsepower capacity may not leave the place where it is rented.

See page 37 for regulations governing personal watercraft dealers and rental operators.

ACCIDENTS

An accident can happen whenever you are on the water despite all the precautions you may have taken. If an accident does occur, follow these simple steps:

- (1) Stop at the scene and assist others who are in trouble if you can do so safely (required by law).
- (2) Don't risk your life or the lives of others to save equipment.
- (3) Summon help by dialing **911** anywhere in

Minnesota.

- (4) If a second boat or other property is involved, exchange your name and boat number with the other operator or owner (as required by law).
- (5) Promptly report all boating accidents to the county sheriff when there is: 1) property damage of \$2,000 or more, 2) personal injury or 3) a fatality. This is required by law.

OTHER WATER ACTIVITIES

SCUBA DIVING

- ★ Scuba divers must display a warning flag when diving.

- ★ The diver's flag must measure at least 15 inches horizontally and 12 inches vertically. Both sides must have a red-colored background bisected diagonally by a three-inch wide white stripe. There is also a blue and white diver's flag authorized under the federal rules of the road.
- ★ No more than four divers shall dive under one flag.
- ★ Divers must remain within 50 feet (measured horizontally) of the warning flag.
- ★ If a group of divers is using a contained area, the perimeter of the area must be marked. The area must be outside the normal area of navigation. These markings must consist of the official diver's flag and must be placed around the perimeter of the diving area at intervals of not more than 150 feet.

- ★ Do not place a diver's flag where it will obstruct navigation.
- ★ The diver's flag may be displayed on a watercraft or float or be anchored to the bottom. The top of the flag must be at least 30 inches above the surface, however.
- ★ Boats not involved with the diving operation must remain 150 feet away from a flag.
- ★ Persons who dive at any time from sunset to sunrise must carry a diver's light visible when above the water for a distance of 150 feet.
- ★ Scuba or skin diving while in possession of a spear is unlawful from sunset to sunrise.

SWIMMING

Private Areas

The owner or lessee of shoreline property may mark off up to 2,500 square feet, but not more than 50 feet along the lake frontage, for a swimming area directly in front of his or her property. Markers to designate a private swimming area must be white with an orange diamond and cross on each side (see illustration on top left, page 30). The markers must extend out of the water at least six inches but no more than 14 and should be spaced no more than 15 feet apart. (Note: A white gallon plastic bottle with the orange markings painted on each side fulfills this requirement.)

Public Areas

Public swimming areas (including resorts) must be marked off with the standard 9" or larger buoy: "Boats Keep Out." This buoy is white with an orange band at the bottom and top. Between the orange bands is an orange diamond with a cross inside. The design appears on opposite sides of the buoy. Above or below the diamond shapes are the words SWIM AREA in black, two-inch lettering (see illustration on

top left, page 30). Marker buoys must not be spaced more than 75 feet apart. Smaller all-white markers may be used to add definition to the area marked by regulation markers. No specific size limits are imposed on public swimming areas.

Permits

Obtain a permit for swimming area markers from the county sheriff. No swimming marker may obstruct navigation or unduly interfere with public use of the water. Sheriffs or conservation officers may direct the owner to move such markers or remove them from the water.

TEMPORARY STRUCTURES, DOCKS AND BUOYS

Docks that extend from shore may not interfere with navigation and generally require no permit, unless they exceed certain width or number of mooring space limits. For current information, see the DNR publication "Docks and Access in Public Waters" by checking the DNR website: mndnr.gov/publications/waters or contacting the DNR Information Center at (651) 296-6157 or toll free (888) 646-6367. (Note: There may be local ordinances on docks.)

Structures such as swimming rafts, boat lifts, buoys, slalom courses, ski jumps, etc., **which do not extend from shore**, cannot be placed in the water between sunset and sunrise without first obtaining a permit from the county sheriff. All structures placed under a permit must have the permit number painted on them. In addition, the structure or buoy must either have a light visible in all directions or be reflectorized so as to reflect light from all directions.

Persons placing structures on joint federal-state waters may need a permit from the U.S. Army Corps of Engineers. (See Special Events page 46, for

examples of these waters.)

SPECIAL EVENTS

Persons holding regattas, races, tournaments, or other competition or exhibition events on the water must first obtain a permit for the event from the county sheriff.

Those persons holding events on commercially-navigable, joint-jurisdictional waters (primarily Lake Superior, the Mississippi River downstream from St. Anthony Falls, the Minnesota River east of Shakopee, and the St. Croix River from Stillwater downstream) must obtain a marine event permit from the U.S. Coast Guard.

PUBLIC WATERS & WATER APPROPRIATION PERMITS

Any work in the bed of public waters (below the ordinary high water level), such as dredging, filling, draining, and placement of structures, **OR** water appropriations of more than ten thousand gallons per day or one million gallons per year requires a permit from the DNR Division of Ecological and Water Resources.

AQUATIC PLANT MANAGEMENT - PERMITS

Any control of aquatic vegetation, either native species or non-native invasive species, in public waters (lakes, rivers, or wetlands) or the control of other aquatic nuisances (e.g., swimmer's itch) falls under the regulatory authority of the MN DNR. Those activities which require a permit, as well as activities that can be done without a permit, are summarized on the next page. For more information regarding aquatic plant management permits, contact the appropriate regional office listed on page 62 or mndnr.gov/shorelandmgmt/apg/regulations.html.

Aquatic plant management permit is required to:

- ★ remove submerged vegetation in: a) an area of more than 2,500 square feet **OR** b) an area exceeding 50 feet along the shoreline or one-half the owner's total frontage, whichever is less,
- ★ apply herbicides, algicides or other pesticides in public waters,
- ★ remove water lilies or other floating-leaf vegetation in an area exceeding a 15-foot wide channel,
- ★ remove cattails, bulrush, wild rice, or other emergent plants by any means.
- ★ move a bog of any size that is free-floating or lodged in any area other than its original location,
- ★ transplant aquatic plants into public waters,
- ★ install or operate an automated plant control device in public waters.

However, there are some things a lakeshore property owner can do without a permit to maintain a boat docking site or swimming area.

A lakeshore property owner may **physically** or **mechanically** clear the following without a permit:

- ★ **Submerged Vegetation:** An area for swimming or boat docking not exceeding 2,500 square feet and not extending more than 50 feet or one-half the length of the owner's shoreline frontage (whichever is less) may be cleared of submerged aquatic vegetation only by cutting or pulling the plants.
- ★ **Floating-Leaf Vegetation:** A boat channel 15 feet or less in width extending to open water may be maintained by mechanical means (cutting or pulling) through floating-leaf (water lilies) and submerged vegetation. The channel must take the most direct route to open water and remain in the same location each year.

- ★ Vegetation that is cut or pulled must be immediately and permanently removed from the water and disposed of on high ground where it will not re-enter the lake.

LOCAL BOATING RESTRICTIONS

Certain bodies of water in Minnesota have local restrictions as to the type and size of watercraft or motor horsepower, areas which can be used by boats, boat speed, times for use, and minimum distance between boats. With few exceptions, local restrictions on boat use on Minnesota waters must be approved by the DNR and posted at public access points.

Questions regarding lakes or rivers with local restrictions can be directed to the appropriate county sheriff, or the DNR offices listed at the end of this publication. The list of approved local restrictions is posted on the DNR web page at: mndnr.gov/regulations/boatwater. Click on local surface use regulations.

BOAT TRAILERS

Dimensions

The maximum length of a boat trailer and boat is 45 feet. No trailer load may exceed 8 1/2 feet in width or 13 1/2 feet in height.

Lights

Two red taillights, license plate light (not required on trailers with permanent registration) and two red reflectors are required on the rear of all trailers. Signal and brake lamps are recommended on all trailers and required whenever the signals of the towing vehicle are not visible to the other drivers. Trailers over 80 inches wide also require front

and rear clearance lamps, and combinations over 30 feet long must have front and rear marker lamps.

Hitch and Coupling

The hitch and coupling of the trailer must meet state standards. Safety chains or cables are required.

Brakes

Brakes of adequate effectiveness are required on all trailers of 3,000 pounds or more gross weight.

Following

Drivers of vehicles towing a trailer must maintain a distance of 500 feet between their vehicle and the vehicle ahead.

More information on trailer laws is available from the Minnesota Department of Public Safety in Saint Paul or from any Minnesota State Patrol office.

BOATING SAFETY TIPS

★What accident causes the most deaths among boaters? Falls overboard and capsizing. In a small boat, resist the urge to stand up. If you must move around, keep your weight low and close to the center of the craft.

★Wear your life jacket, especially in small boats. Approved life jackets are now stylish, comfortable and practical. Models are available for all ages and for various boating activities. Wearing your life jacket is the best “life insurance” policy afloat.

★Collisions with a second boat or another object don’t just happen. They are usually the result of inattention, fatigue, and a lack of knowledge about local water conditions.

★Keep an eye on the weather, especially on larger lakes such as Mille Lacs, Leech, Lake of the Woods, or Superior. Obtain up-to-date weather information from a marine band radio, AM radio, or by simply watching the sky. (Summer storms in Minnesota

usually come from the west and particularly from the southwest.)

If you are caught in rough weather, put on your life jacket, keep low in your boat and head for the closest shore. In heavy waves, your boat handles best when you head into the waves at an angle.

★Whitewater canoeing and kayaking are not sports for the beginner. Learn whitewater techniques from experts, wear your life jacket at all times, and use common sense in shooting rapids.

★Inflatable toys are no substitute for swimming skills. Learn how to swim. Know your swimming ability. Supervise youngsters around the water.

★If someone is in trouble in the water, use elementary rescue methods first, such as throwing something that floats to the victim. Only as a last resort should you ever enter the water to save someone. Even then, take a buoyant object like a life jacket with you.

★Before you leave on a boating or fishing trip, let someone know where you are going and when you will return. If you run into trouble, this will assist authorities in looking for you.

★Cold water shock and hypothermia (below normal body temperature) are insidious killers that may be involved in as many as one-half of Minnesota's boating deaths. The reflexive gasp that occurs when you hit cold water can be fatal if your head is under water when you take that sudden breath and inhale water. If you survive the first minute of immersion in water less than 50 degrees, you only have about 10 minutes of meaningful movement to reboard your boat, tread water or zip on a life vest before your muscles stiffen from the cold. Then there is only about one hour before the cold renders you unconscious. Unless you are wearing a life jacket, drowning is inevitable before the hour runs out.

Cold water robs body heat 25 times faster than air of the same temperature, so if you capsize or fall

out of your boat, immediately attempt to reboard your craft. Most small boats if overturned, can be righted and bailed out. In fact, modern small craft have built-in flotation that will support the weight of the occupants, even after capsizing or swamping. If you can't right the boat - climb on top and hang on.

Wearing your life jacket will help protect you from hypothermia in several ways. It decreases the amount of movement necessary to remain afloat, and it also helps to insulate you from heat loss. A life jacket will also keep you afloat if you become unconscious due to hypothermia.

COLD WATER SURVIVAL TIME

The Danger Zone indicates where safety precautions and appropriate behavior can increase your chances of survival when immersed in cold water.

★ **Booze is bad news!** Alcohol and drugs are involved in about one third of all boating fatalities. In fact, a Coast Guard study from a few years back showed that a boater who was legally intoxicated was 10 times more likely to become involved in a fatal accident than one who was sober.

Alcohol also adversely affects vital body functions such as balance, coordination, vision and judgment. Combining the effects of cold water and alcohol can speed the onset of hypothermia (a dangerous cooling of the body's inner temperature), causing even good swimmers to drown in minutes - often within a few

yards of safety.

Even without drinking, four hours exposure to environmental stressors such as sun, wind, noise, vibration and temperature produce a kind of boater's hypnosis which can slow your reaction time almost as much as if you were drunk. Adding alcohol or drugs to these stressors intensifies their effects to a perilous level.

PROPELLER INJURIES

Each year, people are seriously injured and killed by being hit by a propeller. Be sure to turn off your motor any time people are in the water near your boat, especially near the stern. Never allow passengers to board or exit from the water when the motor is running. The prop may continue to turn even when the motor is in neutral, or someone could accidentally bump the shift lever. Stay away from other boats towing skiers or tubers. Never use reverse to pick someone up from the water, instead go around again. Don't let them sit on the transom, gunwales or bow while underway, unless there are adequate railings to prevent falling overboard. Use the engine cut-off lanyard that came with your motor and consider installing propeller safety devices.

THE "CIRCLE OF DEATH"

Every year, serious injuries and deaths occur when operators let go of the steering wheel or outboard steering handle while the boat is moving. A phenomenon called steering torque forces the motor to slam left causing the boat to swerve sharply to the right, throwing the victim into the water.

The boat continues to travel in a circle and returns to strike the victim in the water, inflicting massive propeller wounds. Thus the term "circle of death."

The way to avoid circle of death accidents is to

avoid letting go of the steering wheel or handle until the boat ceases all forward motion.

If you notice that it takes extra pressure on the steering wheel or handle, have your boat serviced immediately. On some smaller outboards, repair may be as simple as tightening a bolt.

For outboards and inboard-outboard craft, corrective measures may involve resetting the boat's trim tab, the small fin mounted on the anti-ventilation or cavitation plate just behind the prop.

If the motor is equipped with an automatic kill switch, be sure to fasten the lanyard to your life jacket or some article of clothing such as a belt loop. If you do fall out of your boat, the lanyard, which is attached to the electrical system, disables the motor, keeping the boat from circling back to hit you.

Be sure that clamp-on swivel seats are tightly secured and that seat backs are sturdy enough to withstand the shock of a victim being thrown against them.

THE SILENT KILLER - CARBON MONOXIDE

Passengers of just about any boat with a motor on board can be victims of carbon monoxide poisoning. Carbon monoxide is an odorless, colorless, tasteless gas that can be toxic even in very small quantities since its effects are cumulative over time. There have been injuries and deaths caused by the infiltration of poisonous gasses into boats' living and sleeping spaces.

Common signs of carbon monoxide poisoning include irritated eyes, headache, nausea, weakness and dizziness. These symptoms can often be misdiagnosed as seasickness or intoxication.

A newly-recognized phenomenon has been discovered where swimmers died when they ventured too closely to houseboats' swim platforms while engines or generators were running, and victims have been poisoned while being towed or dragged too near the stern of a boat.

To help avoid the dangers of carbon monoxide on your watercraft:

- ★ Keep air flowing throughout the boat whenever any gas or diesel engine or propane appliance is running.
- ★ Stay away from any area where engine or generator exhaust is vented.
- ★ Do not leave your generator running at night or when anchored.
- ★ Install carbon monoxide detectors in the living areas of your boat, test them frequently and never remove the batteries unless you are replacing them with new ones.
- ★ Keep your boat and motor properly maintained including keeping exhaust clamps tight and in place. Also, it's a good idea to

replace exhaust hoses if there is cracking or deterioration.

Skiing, dragging, or tubing closer than 20 feet from a motorboat can be fatal from carbon monoxide poisoning - so stay well away!

THE DROWNING MACHINE

★**Lowhead dams** have claimed 14 lives over the last 20 years. These dams are usually small structures no more than 10 feet high, although some are as low as six inches. Because of their small size, they do not appear to be dangerous, especially from a boat or canoe upstream. In the spring and during other periods of high runoff, however, the dams become very dangerous. The recirculating current created by the water pouring over the dam creates a backwash. This current takes any object - including people wearing life jackets - to the bottom of the stream, releases it to the surface, sucks it back to the face of the dam, and pushes it back to the bottom; the cycle can continue indefinitely. Swimmers, anglers, canoeists and people in motorboats all have fallen victim to this perfect drowning machine. Keep well clear of these structures.

This sign, installed at many dam sites around the state, warns people of the potential dangers of a lowhead dam.

FLOAT PLAN

Before you head out on the water, let someone know where you are going to be boating or fishing and when you will return. Give them a description of your car, where it will be parked, information about your boat and who will be on board. Be sure to contact that person if you are delayed and give them a revised return time. It is very important that the person understands they are to contact the county sheriff or other appropriate agency right away if you don't return by the appointed time. In most cases, a delay in calling for assistance can mean the difference between successful rescue and a recovery operation.

BOATING COURSES

Learn more about boating and water safety. Organizations such as the DNR, U.S. Coast Guard Auxiliary, U.S. Power Squadrons and local school districts have free or low cost education programs and publications available. Call (800) 336-BOAT toll free to find the class nearest you or check out the Internet sites on pages 63-64.

BOATING ON LAKE SUPERIOR

As more people turn to the waters of Lake Superior for fishing and boating, the importance of boating safety cannot be overemphasized.

- ★ Take a boating safety course from the U.S. Coast Guard Auxiliary (USCGA), or U.S. Power Squadrons and get advice from veteran boaters.

- ★ Make sure your craft size is appropriate and you have the required safety equipment - have a USCGA Vessel Safety Check (VSC) to make sure.
- ★ Weather can change rapidly on the lake - monitor the skies and radio.
- ★ Water temperatures on Superior are always cold - even in the summer - always wear your life jacket and consider other survival gear as well.
- ★ Carry a VHF marine radio, chart, visual distress signals and Global Positioning System (GPS) - but remember electronics can sometimes fail.
- ★ Let someone know where you are going and when you will return.
- ★ Take advantage of the DNR's safe harbors and launch ramps on Lake Superior. Order a free copy of the Lake Superior Boating Guide by contacting the DNR at the address or e-mail at the back of this booklet. You may also download it from mndnr.gov/boating and click on Lake Superior Boating Guide.

VISUAL DISTRESS SIGNALS

Lake Superior is the only place in Minnesota where federal law requires the proper number and type of visual distress signals (VDS) to be carried on board boats.

- ★ Craft less than 16 feet, boats participating in organized events, non-motorized open sailboats less than 26 feet and manually propelled boats are NOT required to carry VDS during the daytime, but must carry night VDS when operating between sunset and sunrise.
- ★ All VDS must be U.S. Coast Guard (USCG) approved or certified as meeting USCG requirements, in serviceable condition and readily accessible. Pyrotechnic devices may not be beyond their expiration date. Non-pyrotechnic VDS include the orange distress flag (day signal only) and the electric distress light (night signal only) that automatically flashes the international SOS signal. The distress flag must be at least 3 X 3 feet with a black square and ball on an orange background.
- ★ For more complete information on VDS and other federal requirements see the booklet “Federal Requirements & Safety Tips” available at no charge from the U.S. Coast Guard at uscgboating.org online.

SECURITY

Due to heightened national security, please note the following when you are boating or fishing:

- ★ On occasion, U.S. Navy ships may be encountered on Lake Superior or the Duluth-Superior Harbor - stay at least 100 yards from these vessels, and operate at slow-no wake speed within 500 yards.
- ★ If possible, avoid commercial ships and port areas on Lake Superior.
- ★ Observe any restricted areas near power plants, dams and bridges and when possible, avoid anchoring near these areas.

★ Report any suspicious activity immediately by using your cell phone (a/ways call **911** for an emergency response) or use your marine radio to contact the U.S. Coast Guard, state or local enforcement officers. The Coast Guard has also established a 24-hour toll-free number at its national response center 1-877-24WATCH.

Suspicious activities could include:

- (1) People appearing to be engaged in surveillance activities, especially around critical or restricted areas.
- (2) Unusual boating activity or unattended boats in unusual locations.
- (3) Persons attempting to buy or rent a boat with cash for a short-term undefined use.
- (4) Large numbers of people on board non-passenger vessels.
- (5) Unusual nighttime activity or lights flashing between boats.

PUBLIC WATER ACCESS

The Minnesota DNR provides approximately 1,600 boat accesses and 33 designated water trails throughout the state. An additional 1,400 public accesses are provided by township, city, county and federal government units. Most public accesses have launch ramps but some sites are carry-in only. Boarding docks and restroom facilities are typically available at the busiest sites.

The DNR's boating programs are funded by user fees, including boat license fees and the portion of gas tax related to marine use. This user pay-user benefit system provides funding for both ongoing maintenance, as well as future improvements at boat access sites throughout the state.

Free maps showing public access locations and basic site information are available for most counties. You can view and print them online at the DNR web page:

mndnr.gov/wateraccess

Or call the DNR information Center at (651) 296-6157 or toll free (888) 646-6367

To report a problem at a DNR public water access site, or to obtain additional information on a specific state facility, go to the web site noted above, or call either of the phone numbers that are listed.

WILDLIFE MANAGEMENT AREAS

For regulations pertaining to the use of motorboats within Wildlife Management Areas, be sure to check the “Minnesota Hunting and Trapping Regulations” handbook or contact the MN DNR Information Center at (651) 296-6157 or toll free (888) 646-6367.

SUNKEN BOATS AND VEHICLES

Minnesota law now requires that watercraft and motor vehicles (including cars, trucks, snowmobiles and ATVs) that sink in a lake or river be removed by the owner within 30 days. Owners must also notify the county sheriff within 48 hours. If the watercraft or vehicle is not removed - the local unit of government can remove it and charge the owner two to five times the cost of removal.

FREE PUBLICATIONS ORDER FORM

For more information on boat and water safety, the DNR has these publications available at no charge. Fill out this order form and mail (or e-mail) it to the address below.

- Danger, Thin Ice (ice safety tips)
- Recommended Ice Thickness Safety Card
- Water Safety for Duck Hunters
- Metro Area Rivers Guide (Twin Cities)
- Mississippi River Guide (Hastings to Iowa)
- Minnesota Boating Guide (this publication)
- Dual Language Boating Safety Tips Brochure - English plus one other language. (Please circle which language) - Hmong, Cambodian, Laotian, Spanish, Vietnamese
- Lake Superior Boating Guide
- Water Safety Coloring Book
- Buoy Identification Sticker
- Personal Watercraft Laws
- Personal Watercraft Rules Decal
- Hypothermia, the Cold Facts
- Youth Watercraft Operator Permit Packet
- H₂O Toons (comic book for ages 7-12)
- Stop That Prop (ski boat operator warning sticker)
- Help Stop Aquatic Hitchhikers
- Check The Drain Plug (sticker)

Equal opportunity to participate in and benefit from programs of the Minnesota Department of Natural Resources is available to all individuals regardless of race, color, creed, religion, national origin, sex, marital status, public assistance status, age, sexual orientation, disability or activity on behalf of a local human rights commission. Discrimination inquiries should be sent to the Affirmative Action Officer at Minnesota Department of Natural Resources, 500 Lafayette Road, Saint Paul, MN 55155-4049 or the Office of Civil Rights, U.S. Coast Guard, 2100 2nd Street SW, Washington, DC 20593-0001.

*Printed on recycled paper
containing a minimum of
25% post-consumer waste
and vegetable-based ink.*

The Minnesota boating safety course is now also available online!

Upon successful completion:

12 – 17 year olds earn their Minnesota Watercraft Operator's Permit. Adults broaden their boating knowledge and receive a certificate that may allow them to obtain a discount on their boat insurance!

When you pass the final exam, you can print out a temporary Watercraft Operator's Permit (age 12-17) or Adult Certificate of Completion (18 years and over) right away. The course is free, however there is a one time charge of \$22.50 when you take the final test.
